

relevant to the claim limitations, have the same features as Everlight LED products previously found to infringe the '250 Patent. By this lawsuit, Nichia seeks relief for Meridian's past and ongoing infringement of Nichia's '250 Patent by virtue of Meridian's incorporation of infringing LEDs into its products.

THE PARTIES

3. Plaintiff Nichia Corporation is a corporation organized and existing under the laws of Japan, with its principal place of business at 491 Oka, Kaminaka-Cho, Anan-Shi, Tokushima, Japan 774-8601.

4. Defendant Mary Elle Fashions, Inc. (d/b/a Meridian Electric) ("Meridian") is a corporation organized under and existing under the laws of the State of Missouri with its principal place of business at 2392 Grissom Drive, St. Louis, Missouri 63146. Meridian describes itself as "a privately held company specializing in the design and manufacturing of many types of LED lighting products" providing "branded products under the distribution name Mary Elle." Meridian also engages in business under the name "Meridian Lighting," as reflected in the URL <https://www.meridianlighting.com/>, and may have previously operated under the name Meridian Electric Company, Inc., a now dissolved Missouri entity.

JURISDICTION AND VENUE

5. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. §§ 1331 and 1338(a).

6. Meridian is subject to personal jurisdiction in this judicial district because Meridian is present within, has minimum contacts with, and regularly conducts business in the State of Texas and the Eastern District of Texas.

7. Venue is proper in this judicial district under 28 U.S.C. §§ 1391 and 1400(b).

8. Among other things, Meridian has purposefully availed itself of the privileges of conducting business in the State of Texas and in this judicial district; Meridian has sought protection and benefit from the laws of the State of Texas; Meridian has solicited business in, transacted business within, and has attempted to derive financial benefit from residents of the State of Texas and this judicial district; and Nichia's cause of action arises directly from Meridian's business contacts and other activities in the State of Texas and in this judicial district.

9. More specifically, the accused Meridian LED products have been imported into, offered for sale, and/or sold by or on behalf of Meridian in the Eastern District of Texas. In addition, the accused Meridian lighting products have been, and continue to be, used in the Eastern District of Texas. Meridian, directly and/or through its agents and intermediaries, has placed the products at issue in this lawsuit into the stream of commerce throughout the United States through established distribution channels, with the expectation and/or knowledge that they will be offered for sale, sold, and used in the State of Texas and in this judicial district.

10. Without limiting the foregoing, Meridian offers for sale LED lighting products through its online store, <https://www.meridianlighting.com>. These products include, for example, the Decorative Pleated Shade LED Night Light ("LED Night Light"), <https://www.meridianlighting.com/led-decorative-pleated-shade-night-light>, and the LED 26w Equivalent CFL Plug In Replacement ("CFL Plug"), <https://www.meridianlighting.com/13185-26w-equivalent-bright-white-pl-c-non-dimmable-led>. Meridian's LED lighting products, such as the LED Night Light and the CFL Plug, also are available at nationwide retailers (such as The Home Depot and Walmart) in this judicial district at brick-and-mortar stores and/or through online purchase.

THE PATENT-IN-SUIT

11. U.S. Patent No. 8,530,250, entitled “Light Emitting Device, Resin Package, Resin-Molded Body, and Methods for Manufacturing Light-Emitting Device, Resin Package and Resin-Molded Body,” was duly and lawfully issued by the U.S. Patent and Trademark Office on September 10, 2013. A true and correct copy of the ’250 Patent is attached as Exhibit A.

12. The ’250 Patent lists Hirofumi Ichikawa, Masaki Hayashi, Shimpei Sasaoka, and Tomohide Miki as inventors.

13. Nichia is the owner of the ’250 Patent by valid assignment from the inventors. Nichia owns all rights, title, and interest in the ’250 Patent, including the right to sue for and recover all past, present, and future damages for infringement of the ’250 Patent.

14. The Abstract of the ’250 Patent provides as follows:

Provided is a simple and low-cost method for manufacturing, in a short time, many light emitting devices wherein adhesiveness between a leadframe and a thermosetting resin composition is high. The method for manufacturing the light emitting device having a resin package (20) wherein the optical reflectivity at a wavelength of 350-800 nm after thermal curing is 70% or more and a resin section (25) and a lead (22) are formed on substantially a same surface on an outer surface (20 *b*) has: a step of sandwiching a leadframe (21) provided with a notched section (21 *a*) by an upper molding die (61) and a lower molding die (62); a step of transfer-molding a thermosetting resin (23) containing a light-reflecting substance (26), in a molding die (60) sandwiched by the upper molding die (61) and the lower molding die (62) and forming a resin-molded body (24) on the leadframe (21); and a step of cutting the resin-molded body (24) and the leadframe (21) along the notched section (21 *a*).

THE EVERLIGHT LITIGATION

15. In 2013, Nichia filed an action for patent infringement in this Court against Everlight Electronics Co., Ltd. and Everlight Americas, Inc., and others (collectively, “Everlight”) styled *Nichia Corp. v. Everlight Elecs. Co., Ltd. et al.*, No. 2:13-cv-702-JRG (E.D. Tex.), *appeals docketed*, Nos. 16-1585, 16-1618 (Fed. Cir.) (the “Everlight Litigation”). In the

Everlight Litigation, Nichia accused, *inter alia*, Everlight's 45-21S, 62-257D and 62-217D series products of infringing claims 17, 19, and 21 of the '250 Patent.

16. The Everlight Litigation was tried in this Court from May 11 to 13, 2015, before the Honorable J. Rodney Gilstrap. The Court issued a Memorandum and Opinion in the Everlight Litigation on January 25, 2016 (the "Memorandum"), a true and correct copy of which is attached hereto as Exhibit B. Among other things, the Court found that the accused products infringe the asserted claims of the '250 Patent, and that Everlight had not shown the asserted claims to be invalid.

17. In the Everlight Litigation, the Court construed limitations in claims 1, 17, 19, and 21 of the '250 Patent as follows:

i. The Preambles of Claims 1 and 17 are Claim Limitations

[FF38] In its Claim Construction Memorandum Opinion and Order (Dkt. No. 79), this Court determined that the preambles of claims 1 and 17 are claim limitations. (Claim Construction Order, Dkt. No. 79, at 53-54.) "[T]he entirety of the '250 patent reveals that the preamble language relating to 'light emitting device' does not state a purpose or an intended use of the invention, but rather discloses a fundamental characteristic of the claimed invention that is properly construed as a limitation of the claim itself." (Claim Construction Order, at 54 ("[T]he preamble language gives life, meaning and vitality to the claims by making it clear that claim 17 is directed to a light emitting device and claim 1 is directed to a method for manufacturing a light emitting device.").)

ii. "Lead"

[FF39] Claims 1, 17, 19, and 21 of the '250 patent include the term "lead." This Court construed "lead" as "the portion of the device that conducts electricity." (Claim Construction Order, at 57.) Although a lead must conduct electricity, "this does not foreclose the recited 'lead' from performing other functions in addition to conducting electricity." (Id.)

iii. "A Portion of the Resin Part is Disposed Over a Portion of the Plating on the Upper Surface of the at Least One Lead"

[FF40] Claim 17 of the '250 patent requires that "a portion of the resin part is disposed over a portion of the plating on the upper surface of the at least

one lead,” which was construed to mean “a portion of the resin part is located over a portion of the plating on the upper surface of the at least one lead.” (Claim Construction Order, at 64.) This Court rejected Defendants’ contention that claim 17 “allows for all of the resin part to be disposed over all of the plating on the upper surface of the at least one lead.” (Id. at 63-64 (“A portion is not ‘all’ as Defendants contend.”).)

iv. “Notch”

[FF41] Claim 1 of the ’250 patent requires providing a lead frame having at least one “notch.” This Court construed the term “notch” to mean “an opening that penetrates the lead frame.” (Claim Construction Order, at 66-67.)

v. “Cutting the Resin-Molded Body and the Plated Lead Frame Along the at Least One Notch”

[FF42] Claim 1 recites the step of “cutting the resin-molded body and the plated lead frame along the at least one notch,” which this Court determined should be given its plain and ordinary meaning. (Claim Construction Order, at 67-69.)

vi. “Planar”

[FF43] Claims 1 and 17 require that an outer surface of at least one lead and an outer surface of the resin part are “planar.” This Court construed “planar” to mean “in a substantially same plane.” (Claim Construction Order, at 69-72.) The construction of “planar” does not require that the “leads and outer surface of the resin package to be perfectly flat.” (Claim Construction Order, at 71.)

Memorandum at 16-18.

18. In the Everlight Litigation, the Court found that the 45-21S, 62-217D, and 62-257D series products contain all of the limitations set forth in claims 17, 19, and 21 of the ’250 Patent. Specifically, the Court held as follows:

[FF83] The Court finds that all of the claim limitations of Claim 17 of the ’250 patent exist in and are met by the accused 62-217D and 62-257D series products. .

..

[FF92] The Court finds that all of the claim limitations of Claim 19 of the ’250 patent exist in and are met by the accused 62-217D and 62-257D series products. .

.

[FF94] The Court finds that all of the claim limitations of Claim 21 of the '250 patent exist in and are met by the accused 62-217D and 62-257D series products. .

..

[FF96] The Court finds that all of the claim limitations of Claim 17 of the '250 patent exist in and are met by the accused 45-21S series products. . . .

[FF107] The Court finds that all of the claim limitations of Claim 19 of the '250 patent exist in and are met by the accused 45-21S series products. . . .

[FF109] The Court finds that all of the claim limitations of Claim 21 of the '250 patent exist in and are met by the accused 45-21S series products. . . .

Memorandum at 27-33.

19. In the Everlight Litigation, the Court also found that the “Nichia products covered by the '250 patent (i) have received industry recognition, (ii) satisfy a longstanding but unmet need, and (iii) have achieved commercial success,” and that “[t]he features of the products in [Nichia’s] 757 series are included in the asserted claims of the '250 patent, and these features in turn have contributed to the products’ commercial success.” Memorandum at 50. Specifically, the Court found:

[FF175] A 2013 article in *LEDinside* publication reported on industry praise and recognition for Nichia’s 757 product, stating that Nichia’s 757 series “ignited” the “expansion trend in that category.” (PTX829 (“2013 Review EMC Production Expansion Could Mean Trouble for PCT”).)

[FF176] Moreover, the industry had experienced a long-felt but unmet need for an alternative to incandescent lighting technology. Incandescent lights consume large amounts of energy for a given output of light, and the alternative that followed – fluorescent lighting – contains toxic components. With the advent of Nichia’s 757 series and related products, “there is the availability of low-cost devices that emit a significant amount of light that can be used in light bulbs and emit a pleasant, low-cost light.” []

[FF177] Between 2010 and 2013, Nichia's sales of the products that practice the '250 patent increased from three percent of Nichia's total sales volume, to 27 percent. In 2013, Nichia sold over 13.9 billion units, with revenues of \$1.7 billion. []. The 757 series products themselves showed a similar increase, from 25 million units in 2011 to 2.5 billion units in 2013. In the eight months from January to August 2014, Nichia sold nearly 2.7 billion units of the products in the 757 series. []

[FF178] Although the products in Nichia's 757 series are advertised and marketed as having an "EMC" (thermosetting resin-type) package, the overall structure and design of the package is important to consumers. The products in the 757 series are brighter, they have a long life, they are reliable, they have a low cost, and they can be fabricated quickly to meet customer demand. [] The brightness relates to (i) the resin, (ii) the plated lead frame, and (iii) the fact that the design allows for thin package walls, which allows for better emission of light (for example, by mounting a larger chip). [] The long life and reliability are attributable to the thermosetting resin (which does not discolor in the presence of light), a heat-resistant package design, and a notch in the lead frame that contributes to the package's adhesiveness. In addition, by plating the lead frame before molding, Nichia avoids possible contamination to bonding sites that can reduce the reliability of the bonding process. [] The design and manufacturing process contribute to low cost by allowing Nichia to make many more packages at once. Prior industry practice was to make about 100 packages per lead frame; Nichia makes approximately 2,400 packages per lead frame of its 157 product, and 1,200 packages per lead frame of its 757 product. [] Finally, the advanced manufacturing process allows Nichia to respond quickly to customer orders. []

Memorandum at 48-50.

20. In the Everlight Litigation, the Court concluded that Everlight's 45-21S, 62-217D, and 62-257D series products infringe claims 17, 19, and 21 of the '250 Patent under 35 U.S.C. § 271(a). *See* Memorandum at 114-15.

MERIDIAN'S INFRINGING CONDUCT

21. Meridian imports into the United States, and manufactures, sells, and/or offers for sale in the United States, LED lighting products that incorporate LED devices that, insofar as relevant to the limitations of the asserted claims, have the same features as the Everlight LED products that were held to infringe the '250 Patent in the Everlight Litigation.

22. By way of example only, the Meridian CFL Plug contains LED devices that, insofar as relevant to the claim limitations and as is apparent from their structure, have the same features, as for example, Everlight's 45-21S, 62-257D and 62-217D series products that were held in the Everlight Litigation to infringe claims 17, 19, and 21 of the '250 Patent.

23. Specifically, the LED devices in the CFL Plug have the same features as Everlight's 45-21S, 62-257D and 62-217D series products that were found in the Everlight Litigation to infringe claim 17 of the '250 Patent insofar as those features are relevant with respect to the claim elements. The LED devices found in Meridian's CFL Plug are light emitting devices that include a resin package comprising a resin part and at least one lead. In addition, the LED devices found in the Meridian CFL Plug include an outer surface of the resin part and an outer surface of the at least one lead that are planer at an outer surface of the resin package. The LED devices in the Meridian CFL Plug also include a plating disposed on an upper surface and a lower surface of the at least one lead, and an outer side surface of the at least one lead that is unplated. These LED devices include a portion of the resin part disposed over a portion of the plating on the upper surface of the at least one lead. The LED devices in the Meridian CFL Plug also include the element of claim 19 of the '250 patent – *viz.*, at least one lead comprises a step on a bottom surface or outer surface. Likewise, the LED devices in the Meridian CFL Plug claim 21 of the '250 patent – *viz.*, at least one of the leads comprises two or more different levels.

24. Similarly, also by way of example only, the Meridian LED Night Light contains LED devices that, insofar as relevant to the claim limitations and as is apparent from their structure, have the same features, as for example, Everlight's 45-21S, 62-257D and 62-217D series products that were held in the Everlight Litigation to infringe claims 17, 19, and 21 of the '250 Patent.

25. Specifically, the LED devices in the LED Night Light have the same features as Everlight's 45-21S, 62-257D and 62-217D series products that were found in the Everlight Litigation to infringe claim 17 of the '250 Patent insofar as those features are relevant with respect to the claim elements. The LED devices found in Meridian's LED Night Light are light emitting devices that include a resin package comprising a resin part and at least one lead. In addition, the LED devices found in the LED Night Light include an outer surface of the resin part and an outer surface of the at least one lead that are planer at an outer surface of the resin package. The LED devices in the LED Night Light also include a plating disposed on an upper surface and a lower surface of the at least one lead, and an outer side surface of the at least one lead that is unplated. These LED devices include a portion of the resin part disposed over a portion of the plating on the upper surface of the at least one lead. The LED devices in the LED Night Light also include the element of claim 19 of the '250 patent – *viz.*, at least one lead comprises a step on a bottom surface or outer surface. Likewise, the LED devices in the LED Night Light also include the element of claim 21 of the '250 patent – *viz.*, at least one of the leads comprises two or more different levels.

26. Meridian, directly and/or through intermediaries and agents, imports into the United States, and manufactures, sells, and/or offers for sale in the United States, including in this judicial district, lighting products, such as the CFL Plug and the LED Night Light, that incorporate the infringing LED devices.

COUNT I
(Infringement of U.S. Patent No. 8,530,250)
(35 U.S.C. § 271(a))

27. Nichia repeats and re-alleges each and every allegation of paragraphs 1-26 as if fully set forth herein.

28. The '250 Patent is valid and enforceable.

29. By its importation into the United States, and manufacture, sale and/or offer for sale in the United States, of lighting products that incorporate infringing LED devices, including but not limited to, for example, the Meridian CFL Plug and the LED Night Light, Meridian has been and is now infringing at least claims 17, 19, and 21 of the '250 Patent, in the State of Texas, in this judicial district, and elsewhere, in violation of 35 U.S.C. § 271(a).

30. Meridian's actions are without the consent of Nichia.

31. Nichia has been and will continue to be damaged by Meridian's infringement of the '250 Patent.

32. Nichia and has been and will continue to be irreparably harmed unless Meridian's infringement of the '250 Patent is enjoined.

JURY DEMAND

33. Nichia hereby requests a trial by jury pursuant to Rule 38 of the Federal Rules of Civil Procedure.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff Nichia Corporation prays that the Court enter judgment against Defendant Meridian and in favor of Nichia, as follows:

A. Finding that the '250 Patent was duly and lawfully issued, and is valid and enforceable.

B. Finding that Meridian has infringed one or more of the claims of the '250 Patent;

C. Awarding damages to Nichia in accordance with 35 U.S.C. § 284, including pre-judgment and post-judgment interest, to compensate Nichia for Meridian's infringement of the '250 Patent;

D. Ordering preliminary and permanent injunctive relief restraining and enjoining Meridian and its officers, agents, attorneys, employees, and those acting in privity or active concert with Meridian, from infringement of the '250 Patent for the full term thereof;

E. Finding that this case is exceptional pursuant to 35 U.S.C. § 285;

F. Awarding Nichia its costs and attorneys' fees; and

G. Awarding Nichia such other and further relief as this Court deems just and proper.

DATED: June 13, 2016

Respectfully submitted,

IRELAND CARROLL & KELLEY
